Report on Internal Control Over Financial Reporting

The Bank's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Bank's Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Bank's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Bank, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Bank, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Bank's assets that could have a material effect on its Financial Statements.

The Bank's management has completed an assessment of the effectiveness of internal control over financial reporting as of September 30, 2014. In making the assessment, management used the framework in *Internal Control* - Integrated Framework, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Bank concluded that as of September 30, 2014, the internal control over financial reporting was effective based upon the COSO (1992) criteria. Additionally, based on this assessment, the Bank determined that there were no material weaknesses in the internal control over financial reporting as of September 30, 2014.

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion reviews the financial condition and results of operations of AgFirst Farm Credit Bank (AgFirst or Bank) as of and for the three and nine month periods ended September 30, 2014. These comments should be read in conjunction with the accompanying financial statements, the Notes to the Financial Statements, and the 2013 Annual Report of AgFirst Farm Credit Bank. AgFirst and its related associations (Associations or District Associations) are collectively referred to as the District. The accompanying financial statements were prepared under the oversight of the Audit Committee of the AgFirst Board of Directors.

Key ratios and data reported below, and in the accompanying financial statements, address the financial performance of AgFirst. However, neither the three months nor the nine months results of operations may be indicative of an entire year due to the seasonal nature of a portion of AgFirst's business.

FORWARD-LOOKING INFORMATION

This quarterly report contains forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict. Words such as "anticipates," "believes," "could," "estimates," "may," "should," "will," or other variations of these terms are intended to identify the forward-looking statements. These statements are based on assumptions and analyses made in light of experience and other historical trends, current conditions, and expected future developments. However, actual results and developments may differ materially from AgFirst's expectations and predictions due to a number of risks and uncertainties, many of which are beyond AgFirst's control. These risks and uncertainties include, but are not limited to:

- political, legal, regulatory, financial markets, and economic conditions and developments in the United States and abroad;
- economic fluctuations in the agricultural, rural infrastructure, international, and farm-related business sectors, as well as in the general economy;
- weather-related, disease, and other adverse climatic or biological conditions that periodically occur that impact agricultural productivity and income of District borrowers;
- changes in United States Government support of the agricultural industry and the Farm Credit System (System) as a government-sponsored enterprise (GSE), as well as investor and rating agency reactions to events involving the U.S. Government, other GSEs and other financial institutions; and
- actions taken by the Federal Reserve System in implementing monetary and fiscal policy, as well as other
 policies and actions of the federal government that impact the financial services industry and the debt
 markets.

FINANCIAL CONDITION

Loan Portfolio

AgFirst's loan portfolio consists of direct loans to District Associations (Direct Notes), loan participations/syndications purchased (Capital Markets), Correspondent Lending loans (primarily first lien rural residential mortgages), and loans to Other Financing Institutions (OFIs) as shown below:

Loan Portfolio (dollars in thousands)	September 3	0, 2014	December 3	51, 2013	September 30	, 2013
Direct Notes*	\$ 14,272,722	69.18%	\$ 13,990,178	69.25%	\$ 13,786,315	68.72%
Capital Markets*	3,785,734	18.35	3,726,378	18.45	3,815,353	19.02
Correspondent Lending	2,471,052	11.98	2,401,563	11.89	2,373,785	11.83
Loans to OFIs	100,712	0.49	83,116	0.41	85,066	0.43
Total	\$ 20,630,220	100.00%	\$ 20,201,235	100.00%	\$ 20,060,519	100.00%

^{*}Net of participations sold.

Total loans outstanding were \$20.630 billion at September 30, 2014, an increase of \$429.0 million, or 2.12 percent, compared to total loans outstanding at December 31, 2013 and an increase of \$569.7 million, or 2.84 percent, since September 30, 2013. Compared to 2013 year end, excluding Bank patronage payments to Associations of approximately \$337.7 million which were applied to the Association Direct Notes at the beginning of 2014, loan volume at September 30, 2014 increased 3.80 percent. Overall, Bank loan demand continues to be modest due to a number of reasons, including higher than the historical average capital at the District Associations, which has slowed Direct Note borrowings. Low economic growth has inhibited loan demand from borrowers in economically dependent sectors and borrowers dependent on non-farm income. An increasingly competitive environment for agricultural loans has also challenged volume. Future Bank loan demand is difficult to predict; however, it is expected to remain modest as those factors discussed above are anticipated to persist. Loan volume will also be reduced by Bank patronage payments which will be applied to Association Direct Notes at the beginning of 2015. See *Capital Resources* section below for further information.

Credit Quality

Credit quality of AgFirst's loans is shown below:

	Total Loan	Portfolio	Credit	Quality	as of:

Classification	September 30, 2014	December 31, 2013	September 30, 2013
Acceptable	91.26%	89.00%	88.68%
OAEM *	8.29%	6.89%	7.15%
Adverse **	0.45%	4.11%	4.17%

^{*}Other Assets Especially Mentioned

The changes in credit quality reflected in the table above were primarily due to changes in credit quality of the Direct Notes which is discussed in the *Direct Notes* section below. Loan portfolio credit quality at the producer level reflected improvement primarily due to the stabilization of economic conditions. Most distressed property sales are now occurring at or near appraised values, indicating that real estate values have stabilized in most District markets. Grain prices have declined to levels not seen for a number of years due to higher than expected inventory and harvest levels. This benefitted the poultry, cattle, and swine sectors but will pressure margins of grain producers. Improved housing starts have positively impacted certain housing-related segments such as forestry and nursery/greenhouse but remain below historic levels. Credit quality is anticipated to continue to improve incrementally assuming stable economic conditions.

A financial assistance agreement between the Bank and an Association was terminated effective October 15, 2014. See Note 8, *Commitments and Contingent Liabilities*, in the Notes to the Financial Statements for further information.

^{**}Adverse loans include substandard, doubtful, and loss loans.

The credit conditions discussed above directly affect the credit quality of the Bank's participation/syndication loan portfolio. They also affect the credit quality of loan portfolios and earnings performance of the individual District Associations, which impacts the quality of the Bank's Direct Notes.

Direct Notes

AgFirst's primary business is to provide funding, operational support, and technology services to District Associations. Each Association, in addition to the Bank, is a federally chartered instrumentality of the United States and is regulated by the Farm Credit Administration (FCA). AgFirst has a revolving line of credit, referred to as a Direct Note, in place with each of the District Associations. Each of the Associations funds its lending and general corporate activities primarily by borrowing under its Direct Note. Lending terms are specified in a separate General Financing Agreement (GFA) between AgFirst and each Association. Each GFA contains minimum requirements for borrowing base margin, capital, and earnings that must be maintained by the Association.

At September 30, 2014, the total Direct Note volume outstanding was \$14.273 billion, an increase of \$282.5 million, or 2.02 percent, compared to December 31, 2013. When compared to 2013 year end, excluding Bank patronage payments of approximately \$337.7 million referenced in the *Loan Portfolio* section above, Direct Note volume increased 4.43 percent. See the *Loan Portfolio* section above for the primary reasons for the modest growth in the Direct Note volume from December 2013 to September 2014.

The following table presents selected statistics related to the credit quality of the Direct Note portfolio including accrued interest:

		Direc	t Note Cred	it Quality	as of			
	Septemb 201	/	December 2013	,		September 30, 2013		
	%	#	%	#	%	#		
Classification	Total	Total	Total	Total	Total	Total		
Acceptable	88.89%	15	85.96%	14	85.87%	14		
OAEM *	11.11%	4	9.23%	4	9.42%	4		
Adverse **	0.00%	0	4.81%	1	4.71%	1		

^{*}Other Assets Especially Mentioned

As of September 30, 2014, fifteen of the nineteen District Associations' Direct Notes, representing 88.89 percent of the Direct Note portfolio, were classified acceptable. The four remaining Direct Notes, representing 11.11 percent of the portfolio, were classified as OAEM. From December 31, 2013 to September 30, 2014, the classification of the Direct Note for one Association improved from OAEM to acceptable and the Direct Note classification for another Association improved from adverse to OAEM.

Presently, collection of the full Direct Note amount due is expected from all Associations in accordance with the contractual terms of the debt arrangements, and no allowance has been recorded for Direct Notes. All assets of the various Associations are pledged as collateral for their respective Direct Notes. In the opinion of management, all Association Direct Notes are adequately collateralized. The risk funds of an Association, including both capital and the allowance for loan losses, also protect the interest of the Bank should a Direct Note default.

As of September 30, 2014, two District Associations with combined assets of \$1.003 billion were operating under written supervisory agreements with the FCA. Those agreements require the District Associations to take corrective actions with respect to one or more of the following: asset quality, capital, portfolio management, and corporate governance. Also, as of September 30, 2014, one District Association was operating under a special credit agreement pursuant to its GFA as a result of events of default under the GFA. Neither these enforcement actions nor GFA events of default are expected to have a significant adverse impact on the Bank's or District's financial condition or results of operations.

^{**}Adverse loans include substandard, doubtful, and loss loans.

Capital Markets

The Capital Markets portfolio consists primarily of loan participations and syndications. As of September 30, 2014, this portfolio totaled \$3.786 billion, an increase of \$59.4 million, or 1.59 percent, from December 31, 2013. Borrower demand in this portfolio is anticipated to reflect modest improvement.

AgFirst employs a number of management techniques to limit credit risk, including underwriting standards, limits on the amounts of loans purchased from a single originator, and maximum hold positions to a single borrower and commodity. Although the participations/syndications portfolio is comprised of a small number of relatively large loans, it is diversified both geographically and on a commodity basis. Management makes adjustments to credit policy and underwriting standards when appropriate as a part of the ongoing risk management process.

Credit quality statistics for the participations/syndications portfolio are shown in the following chart:

	Participations/Syndications Credit Quality as of:								
Classification	September 30, 2014	December 31, 2013	September 30, 2013						
Acceptable	94.24%	93.14%	91.56%						
OAEM	3.31%	2.64%	3.50%						
Adverse	2.45%	4.22%	4.94%						

^{*}Other Assets Especially Mentioned

Improvement in the overall credit quality of the participations/syndications portfolio is reflective of the incremental improvement in general economic conditions, including employment, the housing market, and real estate values.

Correspondent Lending

AgFirst also maintains a Correspondent Lending Unit which consists primarily of first lien residential mortgages. As of September 30, 2014, the correspondent lending portfolio totaled \$2.471 billion. From December 31, 2013 to September 30, 2014, this portfolio increased \$69.5 million, or 2.89 percent.

Substantially all loans originated on or before July 31, 2013 in the correspondent lending portfolio have guarantees from the Federal National Mortgage Association (Fannie Mae) and/or the Federal Agricultural Mortgage Corporation (Farmer Mac), thereby limiting credit risk to AgFirst. The guarantees are in the form of Long-Term Standby Commitments to Purchase which give AgFirst the right to deliver delinquent loans to the guarantor at par. The Fannie Mae guarantee program ended on July 31, 2013. Subsequent to this date, new loans in this portfolio purchased by the Bank are held without a Fannie Mae guarantee. At September 30, 2014, \$2.065 billion (83.6% of the total) of loans in the correspondent lending portfolio were guaranteed and \$405.8 million (16.4%) were unguaranteed.

At September 30, 2014, 99.96 percent of the correspondent lending portfolio was classified as acceptable and 0.04 percent was classified as substandard.

Rural home loans combined with Rural Home Mortgage-backed Securities, which totaled \$2.879 billion at September 30, 2014, are limited to 15 percent of total loans outstanding as defined by FCA. Based on September 30, 2014 levels, the Bank has unused capacity of \$261.6 million under a total limit of \$3.140 billion. The Bank monitors this position and will consider options to reduce the Rural Home asset level with actions including, but not limited to, securitizing and selling a portion of its future rural home loan production. See Note 3, *Investment Securities*, for further discussion of Rural Home Mortgage-backed Securities.

Nonaccrual Loans

Nonaccrual loans represent all loans for which there is a reasonable doubt as to the collection of principal and/or interest under the contractual terms of the loan. Nonaccrual loans for the Bank at September 30, 2014 of \$46.0

^{**}Adverse loans include substandard, doubtful, and loss loans.

million decreased 22.76 percent compared to \$59.6 million at December 31, 2013. The decrease of \$13.6 million resulted primarily from repayments of \$17.7 million offset in part by \$8.5 million of transfers into nonaccrual. At September 30, 2014, total nonaccrual loans were primarily classified in the tree fruits/nuts (35.81 percent of the total), forestry (23.30 percent), and nursery/greenhouse (21.51 percent) segments. Nonaccrual loans were 0.22 percent and 0.30 percent of total loans outstanding at September 30, 2014 and December 31, 2013, respectively.

Troubled Debt Restructurings

A troubled debt restructuring (TDR) occurs when a borrower is experiencing financial difficulties and a concession is granted to the borrower that the Bank would not otherwise consider. Concessions are granted to borrowers based on either an assessment of the borrower's ability to return to financial viability or a court order. The concessions can be in the form of a modification of terms, rates, or amounts owed. Acceptance of other assets and/or equity as payment may also be considered a concession. The type of alternative financing granted is chosen in order to minimize the loss incurred by the Bank. TDRs decreased \$261 thousand since December 31, 2013 and totaled \$36.6 million at September 30, 2014. TDRs at September 30, 2014 were comprised of \$15.4 million of accruing restructured loans and \$21.2 million of nonaccrual restructured loans. Restructured loans were primarily in the nursery/greenhouse (29.61 percent of the total), tree fruits/nuts (24.49 percent), and forestry (18.36 percent) segments.

Other Property Owned

Other property owned (OPO) consists primarily of assets once pledged as loan collateral that were acquired through foreclosure or deeded to the Bank (or a lender group) in satisfaction of secured loans. OPO is generally comprised of real estate, equipment, and equity interests in companies or partnerships. OPO decreased \$5.4 million since December 31, 2013 and totaled \$4.2 million at September 30, 2014. The decrease was primarily due to disposals of \$6.0 million. The two largest OPO holdings at September 30, 2014 were two land holdings which totaled \$2.8 million (65.70 percent of the total).

Allowance for Loan Losses

The Bank maintains an allowance for loan losses at a level management considers adequate to provide for probable and estimable credit losses within the loan portfolio as of each reported balance sheet date. The allowance for loan losses was \$20.2 million at September 30, 2014, as compared with \$22.9 million at December 31, 2013, which was a decrease of \$2.7 million. The primary activities within the allowance for the nine months ended September 30, 2014 were reversals of the allowance for loan losses of \$7.5 million, partially offset by provision expense of \$3.7 million and recoveries of \$1.4 million. The largest provision reversal (\$1.3 million) and the largest recovery (\$898 thousand) related to one loan in the forestry segment. See Provision for Loan Losses section below for additional details regarding loan loss provision expense and reversals. The allowance at September 30, 2014 included specific reserves of \$6.1 million (30.06 percent of the total) and general reserves of \$14.1 million (69.94 percent). The general reserves at September 30, 2014 included \$3.9 million of allowance provided by the Bank for loans in the correspondent lending portfolio purchased after July 31, 2013 which are being held without a Fannie Mae guarantee. See further discussion in the Correspondent Lending section above. None of the allowance relates to the Direct Note portfolio as mentioned in the Direct Notes section above. The total allowance at September 30, 2014 was comprised primarily of reserves for the rural home loan (19.45 percent of the total), tree fruits/nuts (15.65 percent), nursery/greenhouse (14.92 percent), and forestry (14.67 percent) segments. See Note 2, Loans and Allowance for Loan Losses, in the Notes to the Financial Statements for further information.

Liquidity and Funding Sources

One of AgFirst's primary responsibilities is to maintain sufficient liquidity to fund the lending operations of the District Associations, in addition to its own needs. Along with normal cash flows associated with lending operations, AgFirst has two primary sources of liquidity: the capacity to issue Systemwide Debt Securities through the Federal Farm Credit Banks Funding Corporation; and cash and investments. The Bank also maintains several lines of credit with commercial banks, as well as securities repurchase agreement facilities.

The U.S. Government does not guarantee, directly or indirectly, Systemwide Debt Securities. However, the Farm Credit System, as a GSE, has benefited from broad access to the domestic and global capital markets. This access has provided the System with a dependable source of competitively priced debt which is critical for supporting the System's mission of providing credit to agriculture and rural America. The implied link between the credit rating of the System and the U.S. Government, given the System's status as a GSE and continued concerns regarding the government's borrowing limit and budget imbalances, could pose risk to the System in the future.

AgFirst's primary source of liquidity comes from its ability to issue Systemwide Debt Securities, which are the general unsecured joint and several obligations of the System banks. AgFirst continually raises funds in the debt markets to support its mission, to repay maturing Systemwide Debt Securities, and to meet other obligations.

The System does not have a guaranteed line of credit from the U.S. Treasury or the Federal Reserve. However, the Farm Credit System Insurance Corporation (FCSIC) has an agreement with the Federal Financing Bank, a federal instrumentality subject to the supervision and direction of the U.S. Treasury, pursuant to which the Federal Financing Bank could advance funds to FCSIC. Under its existing statutory authority, FCSIC may use these funds to provide assistance to the System banks in exigent market circumstances which threaten the banks' ability to pay maturing debt obligations. The agreement provides for advances of up to \$10 billion and terminates on September 30, 2015, unless otherwise renewed. The decision whether to seek funds from the Federal Financing Bank is at the discretion of FCSIC. Each funding obligation of the Federal Financing Bank is subject to various terms and conditions and, as a result, there can be no assurance that funding would be available if needed by AgFirst or the System.

Currently, Standard & Poor's Ratings Services, Moody's Investor Service and Fitch Ratings have assigned long-term debt ratings for the System of AA+, Aaa, and AAA and short-term debt ratings of A-1+, P-1, and F-1, respectively. Standard & Poor's and Moody's outlook for the System is stable. In October 2013, Fitch changed its outlook for the System from stable to negative in connection with Fitch's placement of the U.S. Government on negative watch. Negative changes to the System's credit ratings could reduce earnings by increasing debt funding costs, and could also have a material adverse effect on liquidity, the ability to conduct normal business operations, and the Bank's overall financial condition and results of operations. However, AgFirst anticipates continued access to funding necessary to support the District's and Bank's needs.

At September 30, 2014, AgFirst had \$26.466 billion in total debt outstanding compared to \$26.225 billion at December 31, 2013. Total interest-bearing liabilities increased slightly primarily due to additional funding needs related to modest increases in loans and liquidity investments as discussed elsewhere in this report.

Cash and cash equivalents, which decreased \$443.2 million from December 31, 2013 to a total of \$740.5 million at September 30, 2014, consist primarily of cash on deposit and money market securities that are short-term in nature (from overnight maturities to maturities that range up to 90 days). Incremental movements in cash balances are due primarily to changes in liquidity needs in relation to upcoming debt maturities between reporting periods.

Investment securities totaled \$7.359 billion, or 25.35 percent of total assets at September 30, 2014, compared to \$7.153 billion, or 24.80 percent, as of December 31, 2013. Investment securities increased \$206.5 million (2.89 percent), compared to December 31, 2013. Management maintains the available-for-sale liquidity investment portfolio size generally proportionate with that of the loan portfolio and within regulatory and policy guidelines.

Investment securities classified as being available-for-sale totaled \$6.738 billion at September 30, 2014. Available-for-sale investments at September 30, 2014 included \$4.070 billion in U.S. Government guaranteed securities, \$2.316 billion in U.S. Government agency guaranteed securities, \$160.3 million in non-agency collateralized mortgage obligations (CMOs), and \$191.5 million in asset-backed securities. Since the majority of the portfolio is invested in U.S. Government guaranteed and agency securities, the portfolio is highly liquid and potential credit loss exposure is limited.

As of September 30, 2014, AgFirst exceeded all applicable regulatory liquidity requirements. FCA regulations require that the Bank have a liquidity policy that establishes a minimum total "coverage" level of 90 days and that short-term liquidity requirements must be met by certain high quality investments or cash. "Coverage" is defined as the number of days that maturing debt could be funded with eligible cash, cash equivalents, and available-for-sale investments maintained by the Bank.

Eligible liquidity investments are classified according to three liquidity quality levels with level 1 being the highest. The first 15 days of minimum liquidity coverage are met using only level 1 instruments, which include cash and cash equivalents. Days 16 through 30 of minimum liquidity coverage are met using level 1 and level 2 instruments. Level 2 consists primarily of U.S. Government guaranteed securities. Days 31 through 90 are met using level 1, level 2, and level 3 securities. Level 3 consists primarily of U.S. agency investments. Additionally, a supplemental liquidity buffer in excess of the 90-day minimum liquidity reserve is set to provide coverage to at least 120 days.

At September 30, 2014, AgFirst met all individual level criteria and had a total of 223 days of maturing debt coverage compared to 246 days at December 31, 2013. Cash provided by the Bank's operating activities, primarily generated from net interest income in excess of operating expenses and maturities in the loan portfolio, is an additional source of liquidity for the Bank that is not reflected in the coverage calculation.

Net unrealized gains related to investment securities were \$111.0 million at September 30, 2014, compared to \$100.7 million at December 31, 2013. These net unrealized gains are reflected in Accumulated Other Comprehensive Income (AOCI) in the Financial Statements. The net unrealized gains stem from normal market factors such as the current interest rate environment.

The Bank performs periodic credit reviews, including other-than-temporary impairment analyses, on its entire investment securities portfolio. Based on the results of all analyses, the Bank recognized other-than-temporary credit related impairment of \$1.5 million for the nine months ended September 30, 2014, which was included in Net Other-than-temporary Impairment Losses in the Statements of Income. See Note 3, *Investment Securities*, in the Notes to the Financial Statements for further information.

Capital Resources

Total shareholders' equity increased \$284.3 million (13.24 percent) from December 31, 2013 to a total of \$2.431 billion at September 30, 2014. This increase is primarily attributed to 2014 unallocated retained earnings from net income of \$281.8 million.

On May 15, 2013, the Bank redeemed and cancelled the entire \$150.0 million of Perpetual Non-Cumulative Preferred Stock issued October 14, 2003. This redemption was in accordance with the Board approved capital plan. The stock was redeemed at its par value together with accrued and unpaid dividends. See Note 5, *Shareholders' Equity*, in the Notes to the Financial Statements for further information.

Favorable earnings and minimal balance sheet growth in recent years have resulted in strong Bank capital levels. After considering the current capital levels and projected capital needs, on October 20, 2014, the Bank's Board of Directors declared a special cash patronage distribution totaling \$175.0 million to be paid on January 1, 2015. Also see Note 12, *Subsequent Events*, in the Notes to the Financial Statements.

Regulatory Capital Ratios

AgFirst's regulatory ratios are shown in the following table:

	Regulatory Minimum	9/30/14	12/31/13	9/30/13
Permanent Capital Ratio	7.00%	22.72%	22.85%	22.90%
Total Surplus Ratio	7.00%	22.68%	22.81%	22.86%
Core Surplus Ratio	3.50%	20.20%	19.98%	20.08%
Net Collateral Ratio	103.00%	107.90%	106.83%	107.97%

The FCA sets minimum regulatory capital adequacy requirements for System banks and associations. These requirements are based on regulatory ratios as defined by the FCA, which include permanent capital, total surplus, core surplus, and for System banks only, net collateral. The permanent capital ratio is calculated by dividing permanent capital by a risk-adjusted asset base. The total surplus ratio is calculated by dividing total surplus by a risk-adjusted asset base and the core surplus ratio is calculated by dividing core surplus by a risk-adjusted asset base. Risk-adjusted assets refer to the total dollar amount of the institution's assets adjusted by an appropriate credit

conversion factor as defined by regulation. Generally, higher credit conversion factors are applied to assets with more inherent risk. Unlike the permanent capital, total surplus and core surplus ratios, the net collateral ratio does not incorporate any risk-adjusted weighting of assets. The net collateral ratio is calculated by dividing the Bank's collateral, as defined by FCA regulations, by total liabilities. The permanent capital, total surplus, and core surplus ratios are calculated using three-month average daily balances and the net collateral ratio is calculated using period end balances.

For all periods presented, AgFirst exceeded minimum regulatory standards for all of the ratios. The Bank's permanent capital, total surplus, and core surplus ratios decreased at September 30, 2014 as compared to December 31, 2013. Because these three ratios are calculated using a three month average daily balance for both capital and assets, total Bank declared patronage of \$353.8 million in 2013, which represented approximately 77.4 percent of 2013 net income and was primarily accrued in the fourth quarter of 2013, was fully reflected in these three ratios at September 30, 2014.

On September 4, 2014, the FCA published a proposed rule in the Federal Register to modify the regulatory capital requirements for System banks and associations. See *Regulatory Matters* section below for further discussion on the proposed rule.

RESULTS OF OPERATIONS

Net income for the three months ended September 30, 2014 was \$98.3 million compared to \$118.1 million for the three months ended September 30, 2013, a decrease of \$19.8 million, or 16.8 percent. Net income for the nine months ended September 30, 2014 was \$281.8 million compared to \$350.1 million for the corresponding period in 2013, a decrease of \$68.3 million, or 19.5 percent.

Key Results of Operations Comparisons

	Annualized for the nine months ended September 30, 2014	For the year ended December 31, 2013	Annualized for the nine months ended September 30, 2013
Return on average assets	1.34%	1.61%	1.65%
Return on average shareholders' equity	16.42%	19.45%	19.76%
Net interest margin	1.77%	1.96%	2.00%
Operating expense as a percentage of net interest income and			
noninterest income	24.55%	20.39%	19.35%
Net (charge-offs) recoveries to average loans	0.01%	(0.06)%	(0.07)%

The first four ratios above have deteriorated in 2014 primarily due to a decrease in net interest income which is discussed below. For the operating expense as a percentage of net interest income and noninterest income ratio, operating expense consists primarily of noninterest expense (see discussion below) excluding losses/gains from other property owned. The net (charge-offs) recoveries to average loans ratio has improved in 2014 due to provision recoveries discussed below.

Net Interest Income

Net interest income for the three months ended September 30, 2014 was \$122.7 million compared to \$131.8 million for the same period of 2013, a decrease of \$9.1 million or 6.90 percent. For the nine months ended September 30, 2014, net interest income was \$360.5 million compared to \$408.5 million for the same period of 2013, a decrease of \$48.0 million, or 11.8 percent. The net interest margin, which is net interest income as a percentage of average earning assets, was 1.75 percent and 1.77 percent, a decrease of 15 and 23 basis points, respectively, for the three and nine month periods of 2014 compared to the prior year. The decline in both periods was primarily the result of lower earning asset yields. In addition, the nine month period was negatively impacted by higher rates paid on interest bearing liabilities. Over time, as interest rates change and as assets prepay or reprice, the positive impact on the net interest margin that the Bank has experienced over the last several years from calling debt will continue to

diminish. Lower average balances of investments, as discussed elsewhere in this report, also decreased net interest income for the nine month period.

The following table illustrates the changes in net interest income:

	For the three months ended September 30, 2014 vs. September 30, 2013							For the nine months ended September 30, 2014 vs. September 30, 2013						
		Increase	(dec	rease) due t	cha	nges in:	Increase (decrease) due to changes in							
(dollars in thousands)		Volume		Rate		Total		Volume		Rate		Total

Total Interest Income	\$	2,639	\$	(11,385)	\$	(8,746)	\$	185	\$	(36,331)	\$	(36,146)		
Interest Expense: Interest-Bearing Liabilities	\$	158	\$	189	\$	347	\$	(1,064)	\$	12,929	\$	11,865		
Changes in Net Interest Income	\$	2,481	\$	(11,574)	\$	(9,093)	\$	1,249	\$	(49,260)	\$	(48,011)		

Provision for Loan Losses

AgFirst measures risks inherent in its loan portfolio on an ongoing basis and, as necessary, recognizes provision for loan loss expense so that appropriate allowances for loan losses are maintained. Loan loss provision was a net reversal (recovery) of \$2.0 million and \$3.9 million for the three and nine months ended September 30, 2014, respectively, compared to net reversals of \$5.7 million and \$7.2 million for the corresponding periods in 2013. For the three months ended September 30, 2014, net reversal of allowance for loan losses primarily related to borrowers in the nursery/greenhouse (\$1.3 million) and forestry (\$1.0 million) segments, partially offset by provision expense in the rural home loan (\$1.1 million) segment. For the nine months ended September 30, 2014, net reversals primarily related to borrowers in the forestry (\$2.6 million), tree fruits/nuts (\$1.9 million), and nursery/greenhouse (\$1.5 million) segments, partially offset by provision expense in the rural home loan (\$3.0 million) segment. See Note 2, *Loans and Allowance for Loan Losses*, in the Notes to the Financial Statements for further information.

Noninterest Income

The following table illustrates the changes in noninterest income:

Change in Noninterest Income			he three m l Septemb			For the nine months ended September 30,				
	Increase/									Increase/
(dollars in thousands)	2014		2013	(D	ecrease)		2014		2013	(Decrease)
Loan fees	\$ 2,082	\$	2,316	\$	(234)	\$	6,492	\$	7,662	\$ (1,170)
Building lease income	846		1,143		(297)		2,469		3,326	(857)
Net impairment losses on investments	_		_		_		(1,452)		(2,071)	619
Gains (losses) on investments, net	_		_		_		53		7,592	(7,539)
Gains (losses) on called debt	(506)		(115)		(391)		(5,721)		(4,117)	(1,604)
Gains (losses) on other transactions	(228)		63		(291)		375		(164)	539
Other noninterest income	1,001		1,080		(79)		3,272		3,910	(638)
Total noninterest income	\$ 3,195	\$	4,487	\$	(1,292)	\$	5,488	\$	16,138	\$ (10,650)

For the three months ended September 30, 2014 compared to the corresponding period in 2013, noninterest income decreased \$1.3 million as a result of decreases in all categories of noninterest income. Noninterest income decreased \$10.7 million for the nine months ended September 30, 2014 compared to the nine months ended September 30, 2013 primarily as a result of lower gains on investments.

Loan fees for the three and nine month periods decreased \$234 thousand and \$1.2 million, respectively, primarily as a result of competitive capital market conditions.

The decline in building lease income for the three and nine month periods was primarily due to the Bank occupying space in 2014 in its new office building that was previously leased to tenants.

Gains on investments for the nine month periods decreased \$7.5 million primarily due to \$7.6 million of securities gains recognized in March 2013 on bond sales that were made to manage the investment portfolio's size within regulatory guidelines. See discussion of investments in Note 3, *Investment Securities*, in the Notes to the Financial Statements for further information.

Increased losses on called debt of \$391 thousand and \$1.6 million for the three and nine month periods, respectively, also contributed to the decline in noninterest income. Concession or debt issuance expense is amortized over the life of the underlying debt security. When debt securities are called prior to maturity, any unamortized concession is expensed. The called debt expense is more than offset by interest expense savings realized as called debt is replaced by new debt issued at a lower rate of interest. Over time, the favorable effect on net interest income is diminished as earning assets reprice downward.

Lower net impairment losses on investments for the nine month periods of \$619 thousand resulted primarily from improvement in credit quality of home equity loans which collateralize most of the Bank's impaired investments.

For the three month periods, gains on other transactions decreased \$291 thousand primarily as a result of an increase of \$1.3 million in reserve expense for unfunded commitments, substantially offset by \$775 thousand of lower losses on the sale of correspondent lending loans for the third quarter of 2014 compared to the same period in the prior year. For the nine month periods, gains on other transactions increased \$539 thousand primarily due to a \$527 thousand decrease in reserve expense for unfunded commitments. The reserve changes resulted from fluctuations in both the balance and composition of unfunded commitments for the 2014 periods compared to the 2013 periods.

Noninterest Expenses

The following table illustrates the changes in noninterest expense:

Change in Noninterest Expenses	For the three months ended September 30,							e nine mo Septembe	
(dollars in thousands)		2014		2013		ecrease)	2014	2013	ncrease/ ecrease)
Salaries and employee benefits Occupancy and equipment Insurance Fund premiums Other operating expenses Losses (gains) from other property owned	\$	13,026 5,094 2,392 9,637 (471)	\$	11,366 4,571 2,041 10,208 (4,191)	\$	1,660 523 351 (571) 3,720	\$ 40,150 15,510 6,936 27,251 (1,787)	\$ 34,983 13,079 4,662 29,422 (419)	\$ 5,167 2,431 2,274 (2,171) (1,368)
Total noninterest expenses	\$	29,678	\$	23,995	\$	5,683	\$ 88,060	\$ 81,727	\$ 6,333

Noninterest expense for the three and nine months ended September 30, 2014 increased \$5.7 million and \$6.3 million, respectively, compared to the corresponding periods in 2013. For the three month periods, the increase resulted primarily from an increase in salaries and employee benefits and lower gains from other property owned. For the nine month periods, increases in salaries and employee benefits, occupancy and equipment, and Insurance Fund premiums were partially offset by a decrease in other operating expenses and an increase in gains from other property owned.

Salaries and employee benefits increased \$1.7 million and \$5.2 million for the three and nine month periods, respectively. This was primarily due to a \$1.3 million and \$3.3 million increase, respectively, resulting from a change in the accrual methodology for cash incentives in 2014 to record the related expense throughout the year. These expenses were recorded primarily in the month of December in previous years. Normal salary administration and higher employee benefit costs also contributed to the increase in salaries and employee benefits.

Occupancy and equipment expense increased \$523 thousand and \$2.4 million for the three and nine month periods, respectively, primarily as a result of increases in depreciation and hardware/software maintenance expenses related to the Bank's new data center.

For the three and nine month periods, Insurance Fund premiums increased \$351 thousand and \$2.3 million, respectively. For the nine month periods, this increase resulted primarily from a \$1.4 million insurance fund premium reimbursement received by the Bank in May 2013, after FCSIC made a clarification that cash held in a deposit account at the Federal Reserve Bank qualifies as a deduction in the premium calculation. The reimbursement was for the periods July 1, 2008, when the premium methodology initially changed to a debt basis, through December 31, 2012. Also contributing to the higher expense for both 2014 periods was an increase in the base annual premium rate to 12 basis points in 2014 from 10 basis points in 2013. The FCSIC Board makes premium rate adjustments, as necessary, to maintain the secure base amount which is based upon insured debt outstanding at System banks.

Other operating expenses decreased \$571 thousand and \$2.2 million for the three and nine month periods, respectively, primarily due to \$1.0 million and \$3.2 million less, respectively, in correspondent lending servicing expenses related to guarantee fees. See *Correspondent Lending* section above. These decreases were partially offset by an increase in consulting and professional fees required for system enhancements.

Gains from other property owned decreased \$3.7 million and increased \$1.4 million for the three and nine month periods ended September 30, 2014 compared with the same periods in 2013, respectively. For the three month periods, the decrease resulted from a \$4.3 million gain recorded during the third quarter of 2013. The increase in gains for the nine month periods resulted from the recognition in June 2014 of a \$2.4 million gain on sale of an ethanol property that had previously been deferred and a \$3.1 million decrease in writedowns compared to the same period in the prior year as real estate values stabilized, offset by the \$4.3 million gain recognized in 2013, as previously discussed. See *Other Property Owned* section above for further information.

DISTRICT MERGER ACTIVITY

Please refer to Note 10, *Business Combinations*, in the Notes to the Financial Statements for information regarding merger activity in the District.

REGULATORY MATTERS

On March 31, 2014, the FCA published an interim final rule rescinding all requirements for nonbinding advisory votes on senior officer compensation at System banks and associations. The comment period for the interim rule ended on April 30, 2014 and the final rule became effective on June 18, 2014.

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations.
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption.
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers.
- To comply with the requirements of section 939A of the Dodd-Frank Act.
- To modernize the investment eligibility criteria for System banks.
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

On September 4, 2014, the FCA published a proposed rule in the Federal Register to modify the regulatory capital requirements for System banks and associations. The public comment period ends on January 2, 2015. The stated objectives of the proposed rule are as follows:

• To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as a government-sponsored enterprise.

- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System.
- To make System regulatory capital requirements more transparent.
- To meet the requirements of section 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 1, *Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements*, in the Notes to the Financial Statements, and the 2013 Annual Report of AgFirst Farm Credit Bank for recently issued accounting pronouncements.

NOTE: Shareholder investment in a District Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, Reporting Manager, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Combined information concerning AgFirst Farm Credit Bank and District Associations can also be obtained at the Bank's website, *www.agfirst.com*. AgFirst prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no quarterly report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

Notes to the Financial Statements

(unaudited)

Note 1 — Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements

Organization

The accompanying financial statements include the accounts of AgFirst Farm Credit Bank (AgFirst or Bank). AgFirst and its related Agricultural Credit Associations (Associations or District Associations) are collectively referred to as the AgFirst District (District). A complete description of the organization and operations, the significant accounting policies followed, and the financial condition and results of operations of the Bank as of and for the year ended December 31, 2013 are contained in the 2013 Annual Report to Shareholders. These unaudited interim financial statements should be read in conjunction with the latest Annual Report to Shareholders.

Basis of Presentation

In the opinion of management, the accompanying financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform with generally accepted accounting principles (GAAP) and prevailing practices within the banking industry.

Certain amounts in the prior period financial statements may have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The results for any interim period are not necessarily indicative of the results to be expected for a full year.

Significant Accounting Policies

The Bank maintains an allowance for loan losses at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Bank has been identified. Certain loan pools acquired from several of the District Associations are analyzed in accordance with the selling Association's allowance methodologies for assigning general and specific allowances. The allowance for loan losses is a valuation account used to reasonably estimate loan losses as of the financial statement date. Determining the appropriate allowance for loan losses balance involves significant judgment about when a loss has been incurred and the amount of that loss. The Bank considers factors such as credit risk classifications, collateral values, risk concentrations, weather related conditions, current production and economic conditions, and prior loan loss experience, among others, when determining the allowance for loan losses.

A specific allowance may be established for impaired loans under Financial Accounting Standards Board (FASB) guidance on accounting by creditors for impairment of a loan. Impairment of these loans is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or at the loan's observable market price, or fair value of the collateral if the loan is collateral dependent.

A general allowance may also be established under FASB guidance on accounting for contingencies to reflect estimated probable credit losses incurred in the remainder of the loan portfolio at the financial statement date. The general allowance excludes loans included under the specific allowance discussed above, unless specific characteristics of the loan indicate that it is probable that there would be an incurred loss in a group of loans with those characteristics. The level of the general allowance may be based on management's best estimate of the likelihood of default adjusted for other relevant factors reflecting the current environment.

The credit risk rating methodology is a key component of the Bank's allowance for loan losses evaluation, and is generally incorporated into the institution's loan underwriting standards and internal lending limit. The Bank uses a two-dimensional loan rating model based on internally generated combined system risk rating guidance that incorporates a 14-point risk rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default over a period of time. Probability of default is the probability that a borrower will experience a default within 12 months from the date of the determination of the risk rating. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower is past due more than 90 days. The loss given default is management's estimate as to the anticipated economic loss on a specific loan assuming default has occurred or is expected to occur within the next 12 months.

Each of the 14 categories carries a distinct percentage of default probability. The 14-point risk rating scale provides for granularity of the probability of default, especially in the acceptable ratings. There are nine acceptable categories that range from a borrower of the highest quality to a borrower of minimally acceptable quality. The probability of default between 1 and 9 is very narrow and would reflect almost no default to a minimal default percentage. The probability of default grows more rapidly as a loan moves from a "9" to other assets especially mentioned and grows significantly as a loan moves to a substandard (viable) level. A substandard (non-viable) rating indicates that the probability of default is almost certain.

Recently Issued Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-15, "Presentation of Financial Statements—Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern." The Update is intended to define management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. Under Generally Accepted Accounting Principles (GAAP), financial statements are prepared under the presumption that the reporting organization will continue to operate as a going concern, except in limited circumstances. Financial reporting under this presumption is commonly referred to as the going concern basis of accounting. The going concern basis of accounting is critical to financial reporting because it establishes the fundamental basis for measuring and classifying assets and liabilities. Currently, GAAP lacks guidance about management's responsibility to evaluate whether there is substantial doubt about the organization's ability to continue as a going concern or to provide related footnote disclosures. The Update provides guidance to an organization's management, with principles and definitions that are intended to reduce diversity in the timing and content of disclosures that are commonly provided by organizations today in the financial statement footnotes. The amendments in this Update apply to all companies and not-for-profit organizations and become effective in the annual period ending after December 15, 2016, with early application permitted.

In August 2014, the FASB issued ASU 2014-14, "Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure." Currently, there is diversity in practice related to how creditors classify certain government-guaranteed mortgage loans upon foreclosure. The amendments in this Update require that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met: 1. The loan has a government guarantee that is not separable from the loan before foreclosure; 2. At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim; 3. At the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The amendments in this Update are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. For all other entities, the amendments in this Update are effective for annual periods ending after December 15, 2015, and interim periods beginning after December 15, 2015.

In June 2014, the FASB issued ASU 2014-11, "Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures," which changes the accounting for repurchase-to-maturity transactions and repurchase financing arrangements. It also requires enhanced disclosures about repurchase agreements and other similar transactions. The new guidance aligns the accounting for repurchase-to-maturity

transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements such that these transactions would all be accounted for as secured borrowings. The accounting changes in this Update are effective for public companies for the first interim or annual period beginning after December 15, 2014. In addition, for public companies, the disclosure for certain transactions accounted for as a sale is effective for the first interim or annual period beginning on or after December 15, 2014, and the disclosure for transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. For all other entities, all changes are effective for annual periods beginning after December 15, 2014, and interim periods beginning after December 15, 2015. Earlier application for a public company is prohibited, but all other companies and organizations may elect to apply the requirements for interim periods beginning after December 15, 2014.

In May 2014 the FASB, responsible for U.S. Generally Accepted Accounting Principles (U.S. GAAP), and the International Accounting Standards Board (IASB), responsible for International Financial Reporting Standards (IFRS), jointly issued converged standards on the recognition of revenue from contracts with customers. Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers (Topic 606)" and IFRS 15 "Revenue from Contracts with Customers" are intended to improve the financial reporting of revenue and comparability of the top line in financial statements globally and supersede substantially all previous revenue recognition guidance. The core principle of the new standards is for companies to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration (that is, payment) to which the company expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively (for example, service revenue and contract modifications) and improve guidance for multiple-element arrangements. Because of the pervasive nature of the new guidance, the boards have established a joint transition resource group in order to aid transition to the new standard. For public entities reporting under U.S. GAAP, the amendments in the Update are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. For nonpublic entities, the amendments are effective for annual reporting periods beginning after December 15, 2017, and interim periods within annual periods beginning after December 15, 2018. A nonpublic entity may elect to adopt this guidance earlier under certain circumstances. The amendments are to be applied retrospectively. The Bank has identified ancillary revenues that will be subject to this guidance. However, because financial instruments are not within the scope of the guidance, it is expected that adoption will not have a material impact on the Bank's financial condition or results of operations, but may result in additional disclosures.

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." The amendments in this Update change the requirements for reporting discontinued operations in Subtopic 205-20. A discontinued operation may include a component of an entity or a group of components of an entity, or a business or nonprofit activity. A disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations only if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. A public business entity and a not-for-profit entity that has issued, or is a conduit bond obligor for, securities that are traded, listed, or quoted on an exchange or an over-the-counter market should apply the amendments in this Update prospectively to both of the following: (1) All disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years and (2) All businesses or nonprofit activities that, on acquisition, are classified as held for sale that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years.

In March 2014 the FASB issued ASU 2014-06, "Technical Corrections and Improvements Related to Glossary Terms (Master Glossary)." The amendments in this Update relate to glossary terms, cover a wide range of Topics in the Codification and are presented in four sections: Deletion of Master Glossary Terms, Addition of Master Glossary Term Links, Duplicate Master Glossary Terms, and Other Technical Corrections Related to Glossary Terms. These amendments did not have transition guidance and were effective upon issuance for both public entities and nonpublic entities.

In January 2014 the FASB issued ASU 2014-04, "Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon

Foreclosure." The objective of the amendments in this Update is to reduce diversity by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendments are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. For entities other than public business entities, the amendments in this Update are effective for annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. An entity can elect to adopt the amendments in this Update using either a modified retrospective transition method or a prospective transition method. Early adoption is permitted.

Other recently issued accounting pronouncements are discussed in the 2013 Annual Report to Shareholders.

Note 2 — Loans and Allowance for Loan Losses

For a complete description of the Bank's accounting for loans (including impaired loans and the allowance for loan losses) and definitions of loan types, see the 2013 Annual Report to Shareholders.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. The Bank manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Bank sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the board of directors.

The credit risk management process begins with an analysis of the obligor's credit history, repayment capacity and financial position. Repayment capacity focuses on the obligor's ability to repay the obligation based on cash flows from operations or other sources of income, including non-farm income. Real estate mortgage loans must be secured by first liens on the real estate collateral. As required by Farm Credit Administration (FCA) regulations, each institution that makes loans on a secured basis must have collateral evaluation policies and procedures.

The credit risk rating process for loans uses a two-dimensional structure, incorporating a 14-point probability of default scale (as discussed in Note 1 above) and a separate scale addressing estimated percentage loss in the event of default. The loan rating structure incorporates borrower risk and transaction risk. Borrower risk is the risk of loss driven by factors intrinsic to the borrower. The transaction risk is related to the structure of a credit (tenor, terms, and collateral).

A summary of loans outstanding at period end follows:

(dollars in thousands)	September 30, 2014	December 31, 2013
Direct notes	\$ 14,272,722	\$ 13,990,178
Real estate mortgage	933,702	971,017
Production and intermediate-term	1,039,568	1,215,480
Loans to cooperatives	215,905	202,142
Processing and marketing	845,827	610,065
Farm-related business	191,429	141,530
Communication	210,479	198,546
Energy and water/waste disposal	415,065	453,361
Rural residential real estate	2,394,320	2,324,956
Loans to other financing institutions (OFIs)	100,712	83,116
Other (including Mission Related)	10,491	10,844
Total Loans	\$ 20,630,220	\$ 20,201,235

A substantial portion of the Bank's loan portfolio consists of notes receivable from District Associations (Direct Notes). These notes are used by the Associations to fund their loan portfolios, which collateralize the notes. Therefore, the Bank's concentration of credit risk in various agricultural commodities associated with these notes approximates that of the District as a whole. Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers engaged in similar activities, which would cause them to be similarly

impacted by economic or other conditions. A substantial portion of the Associations' lending activities is collateralized, and their exposure to credit loss associated with lending activities is reduced accordingly, which further mitigates credit risk to the Bank.

The Bank may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with FCA regulations. The following tables present the principal balance of participation loans at periods ended:

								Septembe	r 30), 2014

^{*}Includes the loan types: Loans to cooperatives, Processing and marketing, and Farm-related business.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented. The tables do not include any purchased credit impaired loans.

Note 3 — **Investment Securities**

AgFirst's investments consist primarily of mortgage-backed securities (MBSs) collateralized by U.S. Government or U.S. agency guaranteed residential and commercial mortgages. They are held to maintain a liquidity reserve, manage short-term surplus funds, and manage interest rate risk. These securities meet the applicable FCA regulatory guidelines related to government agency guaranteed investments.

Included in the available-for-sale investments are non-agency collateralized mortgage obligations (CMOs) and asset-backed securities (ABSs). These securities must meet the applicable FCA regulatory guidelines, which require them to be high quality, senior class, and rated in the top category (AAA/Aaa) by Nationally Recognized Statistical Rating Organizations (NRSROs) at the time of purchase. To achieve these ratings, the securities may have a guarantee of timely payment of principal and interest, credit enhancements achieved through over-collateralization or other means, priority of payments for senior classes over junior classes, or bond insurance. All of the non-agency securities owned have one or more credit enhancement features.

The FCA considers a non-agency security ineligible if it falls below AAA/Aaa credit rating criteria and requires Farm Credit System (System) institutions to provide notification to the FCA when a security is downgraded below that rating. Non-agency CMO and ABS securities not rated in the top category by at least one of the NRSROs at September 30, 2014 had a fair value of \$159.1 million and \$38.7 million, respectively. The FCA requires System institutions to provide notification when a security becomes ineligible.

Held-to-maturity investments consist of Mission Related Investments, acquired primarily under the Rural Housing Mortgage-Backed Securities (RHMS) and Rural America Bond (RAB) pilot programs. RHMS must be fully guaranteed by a government agency or government sponsored enterprise. RABs are private placement securities, which generally have some form of credit enhancement.

In its Conditions of Approval for the program, the FCA considers a Rural America Bond ineligible if its investment rating, based on the internal 14-point risk rating scale used to also grade loans, falls below 9. The FCA requires System institutions to provide notification when a security becomes ineligible. At September 30, 2014, the Bank held five Rural America Bonds whose credit quality had deteriorated beyond the program limits.

Effective December 31, 2014, the FCA will conclude each pilot program approved after 2004 as part of the Investment in Rural America (Mission Related Investments) program. Each institution participating in such programs may continue to hold its investment through the maturity dates for the investments, provided the institution continues to meet all approval conditions. The FCA can consider participation in these programs on a case-by-case basis.

During the first nine months of 2014, proceeds from sales of investments were \$2.7 million and realized gains were \$53 thousand. During the first nine months of 2013, proceeds from sales of investments were \$122.2 million and realized gains were \$7.6 million.

A substantial portion of these investments has contractual maturities in excess of ten years. However, expected maturities for these types of securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. This also applies to those securities other-than-temporarily impaired for which a credit loss has been recognized but noncredit-related losses continue to remain unrealized. The following tables show the fair value and gross unrealized losses for investments that have been in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

Numerous factors are considered in determining whether an impairment is other-than-temporary. They include: (1) whether or not management intends to sell the security, (2) whether it is more likely than not that management would be required to sell the security before recovering its costs, and (3) whether management expects to recover the security's entire amortized cost basis (even if there is no intention to sell). If the Bank intends to sell the security or it is more likely than not that it would be required to sell the security, the impairment loss recognized equals the full difference between amortized cost and fair value of the security. When the Bank does not intend to sell securities in an unrealized loss position and it is not more likely than not that it would be required to sell the securities, other-than-temporary impairment loss is separated into credit loss and noncredit loss. Credit loss is defined as the shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis.

The Bank performs periodic credit reviews, including other-than-temporary impairment analyses, on its investment securities portfolio. The objective is to quantify future possible loss of principal or interest due on securities in the portfolio. Factors considered in determining whether an impairment is other-than-temporary include among others: (1) the length of time and the extent to which the fair value is less than cost, (2) adverse conditions specifically related to the industry, (3) geographic area and the condition of the underlying collateral, (4) payment structure of the security, (5) ratings by rating agencies, (6) the creditworthiness of bond insurers, and (7) volatility of the fair value changes.

The Bank uses the present value of cash flows expected to be collected from each debt security to determine the amount of credit loss. This technique requires assumptions related to the underlying collateral, including default rates, amount and timing of prepayments, and loss severity. Assumptions can vary widely from security to security and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics, and collateral type.

Significant inputs used to estimate the amount of credit loss include, but are not limited to, performance indicators of the underlying assets in the security (including default rates, delinquency rates, and percentage of nonperforming assets), loan-to-collateral value ratios, third-party guarantees, current levels of subordination, vintage, geographic concentration, and credit ratings. The Bank obtains assumptions for the default rate, prepayment rate, and loss severity rate from an independent third party.

Following are the assumptions used at:

	September 30, 2014								
Assumptions Used	Mortgage-backed Securities	Asset-backed Securities							
Default rate by range	0.74% to 30.68%	6.76% to 48.55%							
Prepayment rate by range Loss severity by range	5.95% to 15.48% 3.94% to 66.66%	5.30% to 11.77% 60.95% to 100.00%							

December 31, 2013								
Mortgage-backed Securities	Asset-backed Securities							
0.46% to 46.36%	7.77% to 61.91%							
4.59% to 10.37%	5.02% to 15.08% 57.46% to 100.00%							
	Mortgage-backed Securities 0.46% to 46.36%							

Based on the results of all analyses, the Bank has recognized credit-related other-than-temporary impairment of \$1.5 million for 2014, which is included in Net Other-than-temporary Impairment Losses in the Statements of Income. Since the Bank does not intend to sell these other-than-temporarily impaired debt securities and is not more likely than not to be required to sell before recovery, the total other-than-temporary impairment is reflected in the Statements of Income with: (1) a net other-than-temporary impairment amount related to estimated credit loss, and (2) an amount relating to all other factors, recognized as a reclassification to or from Other Comprehensive Income.

The following schedule details the activity related to cumulative credit losses on investments recognized in earnings for which a portion of an other-than-temporary impairment was recognized in other comprehensive income:

Amount related to credit loss-beginning balance Additions for initial credit impairments Additions for subsequent credit impairments Reductions for increases in expected cash flows Reductions for securities sold/settled/matured	\$	58,164 - - (199)	\$	57,147 - (235) -	\$ 57,131 - 1,452 (618)	\$	55,654 339 1,732 (813)		
Amount related to credit loss-ending balance		57,965		56,912	57,965		56,912		
Life to date incurred credit losses		(21,012)		(19,257)	(21,012)		(19,257)		
Remaining unrealized credit losses	\$	36,953	\$	37,655	\$ 36,953	\$	37,655		

For all other impaired investments, the Bank has not recognized any credit losses as the impairments are deemed temporary and result from noncredit related factors. The Bank has the ability and intent to hold these investments until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities. Substantially all of these investments were in U.S. Government agency securities and the Bank expects these securities would not be settled at a price less than their amortized cost.

Note 4 — Debt

Bonds and Notes

AgFirst, unlike commercial banks and other depository institutions, obtains funds for its lending operations primarily from the sale of Systemwide Debt Securities issued jointly by the System banks through the Funding Corporation. Certain conditions must be met before AgFirst can participate in the issuance of Systemwide Debt Securities. As one condition of participation, AgFirst is required by the Farm Credit Act and FCA regulations to maintain specified eligible assets at least equal in value to the total amount of debt obligations outstanding for which it is primarily liable. This requirement does not provide holders of Systemwide Debt Securities with a security interest in any assets of the banks.

In accordance with FCA regulations, each issuance of Systemwide Debt Securities ranks equally with other unsecured Systemwide Debt Securities. Systemwide Debt Securities are not issued under an indenture and no trustee is provided with respect to these securities. Systemwide Debt Securities are not subject to acceleration prior to maturity upon the occurrence of any default or similar event.

The System may issue the following types of Systemwide Debt Securities:

- Federal Farm Credit Banks Consolidated Systemwide Bonds,
- Federal Farm Credit Banks Consolidated Systemwide Discount Notes,
- Federal Farm Credit Banks Consolidated Systemwide Master Notes,
- Federal Farm Credit Banks Global Debt Securities, and
- Federal Farm Credit Banks Consolidated Systemwide Medium-Term Notes.

Additional information regarding Systemwide Debt Securities can be found in their respective offering circulars.

The following table provides a summary of AgFirst's participation in outstanding Systemwide Debt Securities by maturity. Weighted average interest rates include the effect of related derivative financial instruments.

September 30, 2014

	Bond	S	Discount	Notes	Total				
Maturities	Amortized Cost	Weighted Average Interest Rate	Amortized Cost	Weighted Average Interest Rate	Amortized Cost	Weighted Average Interest Rate			
	(dollars in thousands)

Total	\$ 22,697,838	0.93%	\$ 3,768,253	0.13%	\$ 26,466,091	0.82%			

Discount notes are issued with maturities ranging from 1 to 365 days. The average maturity of discount notes at September 30, 2014 was 117 days.

Note 5 — Shareholders' Equity

Perpetual Preferred Stock

Payment of dividends or redemption price on issued Preferred Stock may be restricted if the Bank fails to satisfy applicable minimum capital adequacy, surplus, and collateral requirements.

On May 15, 2013, the Bank redeemed and cancelled the entire \$150.0 million of Perpetual Non-Cumulative Preferred Stock issued October 14, 2003. The stock was redeemed at its par value together with accrued and unpaid dividends.

⁽a) Amounts in parentheses indicate debits to AOCI.

Note 6 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

⁽b) Amounts in parentheses indicate debits to profit/loss.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

The classifications within the fair value hierarchy are as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. Level 1 assets and liabilities could include investment securities and derivative contracts that are traded in an active exchange market, in addition to certain U.S. Treasury securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. Level 2 assets and liabilities could include investment securities that are traded in active, non-exchange markets and derivative contracts that are traded in active, over-the-counter markets.

Level 3 inputs are unobservable and supported by little or no market activity. Level 3 assets and liabilities could include investments and derivative contracts whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, and other instruments for which the determination of fair value requires significant management judgment or estimation. Level 3 assets and liabilities could also include investments and derivative contracts whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

For a complete discussion of the inputs and other assumptions considered in assigning various assets and liabilities to the fair value hierarchy levels, see the most recent Annual Report to Shareholders.

The Bank had no transfers of assets or liabilities measured on a recurring basis into or out of Level 1 or Level 2 during the reporting period. For Level 3 assets and liabilities measured at fair value on a recurring basis, the tables below present a reconciliation from the opening balances to the closing balances, and any transfers into or out of Level 3.

SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

Investment Securities

The fair values of predominantly all Level 3 investment securities have consistent inputs, valuation techniques and correlation to changes in underlying inputs. The models used to determine fair value for these instruments use certain significant unobservable inputs within a discounted cash flow or market comparable pricing valuation technique. Such inputs generally include discount rate components including risk premiums, prepayment estimates, default estimates and loss severities.

These Level 3 assets would decrease (increase) in value based upon an increase (decrease) in discount rates, defaults, or loss severities. Conversely, the fair value of these assets would generally increase (decrease) in value if the prepayment input were to increase (decrease).

Generally, a change in the assumption used for defaults is accompanied by a directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayments. Unobservable inputs for loss severities do not normally increase or decrease based on movements in the other significant unobservable inputs for these Level 3 assets.

Derivative Instruments

Level 3 derivative instruments consist of forward contracts that represent a hedge of an unrecognized firm commitment to purchase agency securities at a future date. The value of the forward is the difference between the fair value of the security at inception of the forward and the measurement date. Significant inputs for these valuations would be discount rate and volatility. These Level 3 derivatives would decrease (increase) in value based upon an increase (decrease) in the discount rate.

Generally, for derivative instruments which are subject to changes in the value of the underlying referenced instrument, change in the assumption used for default rate is accompanied by directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayment rates.

Unobservable inputs for discount rate and volatility do not increase or decrease based on movements in other significant unobservable inputs for these Level 3 instruments.

Inputs to Valuation Techniques

Management determines the Bank's valuation policies and procedures. Internal valuation processes are calibrated annually by an independent consultant. Fair value measurements are analyzed on a periodic basis. Documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing.

Quoted market prices are generally not available for the instruments presented below. Accordingly, fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fair Value	Valuation Technique(s)	Unobservable Input	Range
Forward contracts – when-issued securities	\$ _	Broker/Consensus pricing	Offered quotes	None outstanding
Non-agency securities	\$ 198,969	Vendor priced	**	
Impaired loans and other property owned	\$ 62,744	Appraisal	Income and expense	*
			Comparable sales	*
			Replacement cost	*
			Comparability adjustments	*

^{*} Ranges for this type of input are not useful because each collateral property is unique.

Information about Recurring and Nonrecurring Level 2 Fair Value Measurements

	Valuation Technique(s)	Input

Note 7 — Employee Benefit Plans

Following are retirement and other postretirement benefit expenses for the Bank:

(dollars in thousands)	 For the thr ended Sept			For the nine months ended September 30,				
	2014	2013	2014		2013			
Pension 401k Other postretirement benefits	\$ 2,403 374 272	\$ 2,425 306 269	\$	7,208 1,138 816	\$	7,274 914 808		
Total	\$ 3,049	\$ 3,000	\$	9,162	\$	8,996		

Following are retirement and other postretirement benefit contributions for the Bank. Projections are based upon actuarially determined amounts as of the most recent measurement date of December 31, 2013.

(dollars in thousands)	Actual	Projected	Projected			
	YTD	Contributions	Total			
	Through	for Remainder	Contributions			
	9/30/14	of 2014	2014			
Pensions Other postretirement benefits	\$ 433	\$ 7,001	\$ 7,434			
	753	296	1,049			
Total	\$ 1,186	\$ 7,297	\$ 8,483			

Contributions in the above table include allocated estimates of funding for multi-employer plans in which the Bank participates. These amounts may change when a total funding amount and allocation is determined by the respective Plans' Sponsor Committees. Also, market conditions could impact discount rates and return on plan assets which could change contributions necessary before the next plan measurement date of December 31, 2014.

Further details regarding employee benefit plans are contained in the most recent Annual Report to Shareholders.

In May 2014, the AgFirst Plan Sponsor Committee voted to approve changes to certain employee benefit plans as follows:

- (1) On January 1, 2015, the AgFirst Farm Credit Cash Balance Retirement Plan (Cash Balance Plan) will be frozen, employer contributions will cease, and the Cash Balance Plan will be closed to new entrants.
- (2) In lieu of participation in and contributions to the Cash Balance Plan, additional employer contributions will be made to the Farm Credit Benefits Alliance 401(k) Plan.

The above changes are expected to become officially executed plan amendments in mid-November 2014. The Cash Balance Plan will not be terminated on January 1, 2015, but is expected to be terminated in 2015 or 2016 once all necessary actions have been performed and approvals obtained. Participants in the Cash Balance Plan will continue to receive employer contributions to their hypothetical cash balance accounts through the end of 2014, at which time contributions will cease. Participants will continue receiving interest credits on the same basis as currently being provided until the Cash Balance Plan is terminated. Participants who are not already fully vested in their accounts will automatically become 100% vested on December 31, 2014. Following the termination of the Cash Balance Plan, vested benefits will be distributed to participants.

Beginning on January 1, 2015, for participants in the Cash Balance Plan and eligible employees hired on or after this date, an additional employer contribution will be made to the Farm Credit Benefits Alliance 401(k) Plan equal to 3% of the participants' eligible compensation.

Accounting guidance related to the curtailment of future benefit service under the Cash Balance Plan, as prescribed in ASC 715 "Compensation – Retirement Benefits," will apply if the plan amendments are officially executed as expected in mid-November 2014. If the AgFirst Plan Sponsor Committee approves to fund the Cash Balance Plan in 2014 to the approximate level of the expected vested benefits to be distributed following plan termination, additional related expense will be recognized during the fourth quarter of 2014. This is not expected to have a material impact on the Bank's financial condition or results of operations.

Note 8 — Commitments and Contingent Liabilities

Association Financial Assistance

Effective January 1, 2011, Farm Credit of North Florida, ACA, Farm Credit of Southwest Florida, ACA, and Farm Credit of South Florida, ACA, merged to form Farm Credit of Florida, ACA. As part of the merger, those Associations entered into an agreement with the Bank under which the Bank would provide limited financial assistance to the merged Association in the event of substantial further deterioration in the combined high risk asset portfolio of the merged Association. No assistance was provided by the Bank to the merged Association under the agreement at September 30, 2014 or December 31, 2013. This agreement was terminated effective October 15, 2014.

Other Commitments and Contingencies

Under the Farm Credit Act of 1971, each System bank is primarily liable for its portion of Systemwide bond and discount note obligations. Additionally, the four banks are jointly and severally liable for the bonds and notes of the other System banks under the terms of the Joint and Several Liability Allocation Agreement. Published in the Federal Register, the agreement prescribes the payment mechanisms to be employed in the event one of the banks is unable to meet its debt obligations.

In the event a bank is unable to timely pay principal or interest on an insured debt obligation for which the bank is primarily liable, the Farm Credit System Insurance Corporation (FCSIC) must expend amounts in the Insurance Fund to the extent available to ensure the timely payment of principal and interest on the insured debt obligation. The provisions of the Farm Credit Act providing for joint and several liability of the banks on the obligation cannot be invoked until the amounts in the Insurance Fund have been exhausted. However, because of other mandatory and discretionary uses of the Insurance Fund, there is no assurance that there will be sufficient funds to pay the principal or interest on the insured debt obligation.

Once joint and several liability is initiated, the FCA is required to make "calls" to satisfy the liability first on all non-defaulting banks in the proportion that each non-defaulting bank's available collateral (collateral in excess of collateralized obligations) bears to the aggregate available collateral of all non-defaulting banks. If these calls do not satisfy the liability, then a further call would be made in proportion to each non-defaulting bank's remaining assets. Upon making a call on non-defaulting banks with respect to a Systemwide Debt Security issued on behalf of a defaulting bank, the FCA is required to appoint FCSIC as the receiver for the defaulting bank. The receiver would be required to expeditiously liquidate assets of the bank.

During the periods presented, AgFirst did not make any payments, and as of the report date does not anticipate making any payments, on behalf of its co-obligors under the Joint and Several Liability Allocation Agreement.

(dollars in billions)	9/30/14	12/31/13
Total System bonds and notes	\$ 214.352	\$ 207.489
AgFirst bonds and notes	\$ 26.466	\$ 26.225

From time to time, legal actions are pending against the Bank in which claims for money damages are asserted. On at least a quarterly basis, the Bank assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management and legal counsel are of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Bank. Because it is not probable that the Bank will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

Note 9 — Additional Financial Information

Offsetting of Financial and Derivative Assets

There were no liabilities subject to master netting arrangements or similar agreements during the reporting periods.

A description of the rights of setoff associated with recognized derivative assets and liabilities subject to enforceable master netting arrangements is located in Note 11, *Derivative Financial Instruments and Hedging Activities*.

The reverse repurchase agreements are accounted for as collateralized lending.

Note 10 — Business Combinations

In February 2014, the Boards of Directors of AgChoice Farm Credit, ACA and MidAtlantic Farm Credit, ACA (collectively referred to as the "Merger Associations") signed a Letter of Intent to merge. The Letter of Intent to merge allowed the Merger Associations to explore the benefits of a merger. During the second quarter of 2014, the Boards of the Merger Associations determined a merger would not be in the best interests of their shareholders and discontinued merger discussions.

Note 11 — Derivative Financial Instruments and Hedging Activities

One of the Bank's goals is to minimize interest rate sensitivity by managing the repricing characteristics of assets and liabilities so that the net interest margin is not adversely affected by movements in interest rates. The Bank maintains an overall interest rate risk management strategy that may incorporate the use of derivative instruments to lower cost of funding or to reduce interest rate risk. Currently, the primary derivative type used by the Bank is interest rate swaps, which convert fixed interest rate debt to a lower floating interest rate than was achievable from issuing floating rate debt with identical repricing characteristics. They may allow the Bank to lower funding costs, diversify sources of funding, or alter interest rate exposures arising from mismatches between assets and liabilities. Under these arrangements, the Bank agrees with other parties to exchange, at specified intervals, payment streams calculated on a specified notional principal amount, with at least one stream based on a specified floating rate index.

The Bank may also purchase interest rate derivatives such as caps, in order to reduce the impact of rising interest rates on its floating-rate debt, and floors, in order to reduce the impact of falling interest rates on its floating-rate assets. In addition, the Bank may also fix a price to be paid in the future which qualifies as a derivative forward contract.

As a result of interest rate fluctuations, interest income and interest expense related to hedged variable-rate assets and liabilities, respectively, will increase or decrease. Another result of interest rate fluctuations is that hedged fixed-rate assets and liabilities will appreciate or depreciate in market value. The effects of any earnings variability or unrealized changes in market value are expected to be substantially offset by the Bank's gains or losses on the derivative instruments that are linked to these hedged assets and liabilities. The Bank considers its strategic use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

The primary types of derivative instrument used and the amount of activity for the periods presented is summarized in the following table:

	 For the Nine Months Ended September 30,								
	201	4			201	3			
Notional Amounts (dollars in millions)	 ceive- l Swaps		ward tracts		ceive- l Swaps		vard racts		
Balance at beginning of period Additions	\$ 250 -	\$	- 8	\$	360	\$	- -		
Maturities/amortization Terminations	_		(8)		(50)		_		
Balance at end of period	\$ 250	\$	_	\$	310	\$	_		

By using derivative instruments, the Bank exposes itself to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract, the Bank's credit risk will equal the fair value gain in the derivative. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes the Bank, thus creating a repayment risk for the Bank. When the fair value of the derivative contract is negative, the Bank owes the counterparty and, therefore, assumes no repayment risk.

To minimize the risk of credit losses, the Bank transacts with counterparties that have an investment grade credit rating from a major rating agency and also monitors the credit standing of, and levels of exposure to, individual counterparties. The Bank typically enters into master agreements that contain netting provisions. These provisions allow the Bank to require the net settlement of covered contracts with the same counterparty in the event of default by the counterparty on one or more contracts. The Bank does not anticipate nonperformance by any of these counterparties. A number of swaps are supported by collateral arrangements with counterparties. Accounting guidance requires a pledgee to reflect as a liability the value of any cash collateral held in its statement of condition. However, securities held as collateral are not reported in the pledgee's statement of condition, even though in the custody of the pledgee.

Counterparty exposure related to derivatives at:

(dollars in millions)	September 30, 2014	December 31, 2013
Estimated Gross Credit Risk	\$19.0	\$27.5
Percent of Notional	7.60%	11.01%
Cash Collateral Held (on balance sheet)	\$ -	\$-
Securities Collateral Held (off balance sheet)	\$1.7	\$8.6
Cash Collateral Posted (off balance sheet)	\$ -	\$-
Securities Collateral Posted (on balance sheet)	\$-	\$-

The Bank's derivative activities are monitored by its Asset-Liability Management Committee (ALCO) as part of the Committee's oversight of the Bank's asset/liability and treasury functions. The ALCO is responsible for approving hedging strategies that are developed within parameters established by the Bank's Board of Directors through the analysis of data derived from financial simulation models and other internal and industry sources. The resulting hedging strategies are then incorporated into the Bank's overall interest rate risk-management strategies.

Fair Value Hedges

For derivative instruments designated as fair value hedges, the gains or losses on the derivative, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in current earnings. The Bank includes the gain or loss on the hedged items in the same line item (interest expense) as the offsetting loss or gain on the related interest rate swaps. The amount of the loss on interest rate swaps recognized in interest expense for the nine months ended September 30, 2014 was \$8.5 million, while the amount of the gain on the Systemwide Debt Securities was \$8.5 million. The amount of the loss on interest rate swaps recognized in interest expense for the nine months ended September 30, 2013 was \$11.0 million, while the amount of the gain on the Systemwide Debt Securities was \$11.0 million. Gains and losses on each derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Cash Flow Hedges

From time to time, the Bank may acquire when-issued securities, generally government agency guaranteed bonds. The when-issued transactions are contracts to purchase securities that will not be delivered until 30 or more days in the future. These purchase commitments are considered derivatives (cash flow hedges) in the form of forward contracts. Any differences in market value of the contracted securities, between the purchase and reporting or settlement date, represent the value of the forward contracts. These amounts are included in Other Comprehensive Income (OCI), and Other Liabilities or Other Assets as appropriate, as firm commitments in the Bank's Balance Sheet for each period end. As of the periods presented, the Bank had not committed to purchase any when-issued bonds.

For derivative instruments that are designated and qualify as a cash flow hedge, such as the Bank's forward contracts, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Fair Values of Derivative Instruments

The following tables represent the fair value of derivative instruments designated as hedging instruments for the periods presented:

(dollars in thousands)	Balance Sheet Classification – Assets	9/30/14 Fair Value	Balance Sheet Classification – Liabilities	9/30/14 Fair Value
Receive-fixed swaps Forward contracts Total	Other Assets Other Assets	\$ 19,008 - \$ 19,008	Other Liabilities Other Liabilities	\$ - - \$ -
(dollars in thousands)	Balance Sheet Classification – Assets	12/31/13 Fair Value	Balance Sheet Classification – Liabilities	12/31/13 Fair Value
Receive-fixed swaps		e 27.514	Other Liabilities	
Forward contracts Total	Other Assets Other Assets	\$ 27,514 - \$ 27,514	Other Liabilities Other Liabilities	\$ - - \$ -

The following table sets forth the amount of net gain (loss) on derivatives recognized in earnings and, for cash flow hedges, the amount of net gain (loss) recognized in AOCI for the periods presented. See Note 5, *Shareholders' Equity*.

Amount of Coin on

(dollars in thousands)	Location of Gain or (Loss) Recognized in, or Reclassified from AOCI into, Income	Amount of Gain or (Loss) Recognized in, or Reclassified from AOCI into, Income **				Amount of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)					Amount of Gain or (Loss) Recognized in OCI on Derivative (Effective Portion)			
		2	014	:	2013	20)14	20)13		2014	20	13	
Fair Value Hedges: Receive-fixed swaps	Noninterest income	\$	_	\$	_									
Cash Flow Hedges:														
Firm Commitments	Interest Income Gains (Losses) on	\$	668	\$	943	\$	-	\$	-	\$	-	\$	-	
Forward Contracts	Other Transactions		157		_		_		_		(157)			

^{**} Represents total gain or loss for fair value hedges and effective portion for cash flow hedges.

Note 12 — Subsequent Events

The Bank evaluated subsequent events and determined that, except as described below and in Note 8, *Commitments and Contingent Liabilities*, there were none requiring disclosure through November 7, 2014, which is the date the financial statements were issued.

On October 20, 2014, the Bank's Board of Directors declared a special patronage distribution totaling \$175.0 million to be paid on January 1, 2015.
